SWING TRADE

In trade 2 Days to 4 Weeks

Target Profit at least 10%

If price keeps going up after this you keep moving stop up (as explained later)

SPREAD

E.g MSFT stock

$10.00 x $10.01

difference = 0.01 = Spread

Price you can Sell at

Price you can Buy

Stock Broker

M&S stock

£10 x 1000 = £10,000

share price — How many shares bought — cost.

£10.10 If price goes up to here profit = £100

Spread Bet

(International clients can use CFD's which are similar)

£10 share price

£10.10 profit = 10 x £10

price increase — Bet size

£10 → 1p

Bet Size

(You get £10 for every 1p the price goes up)
