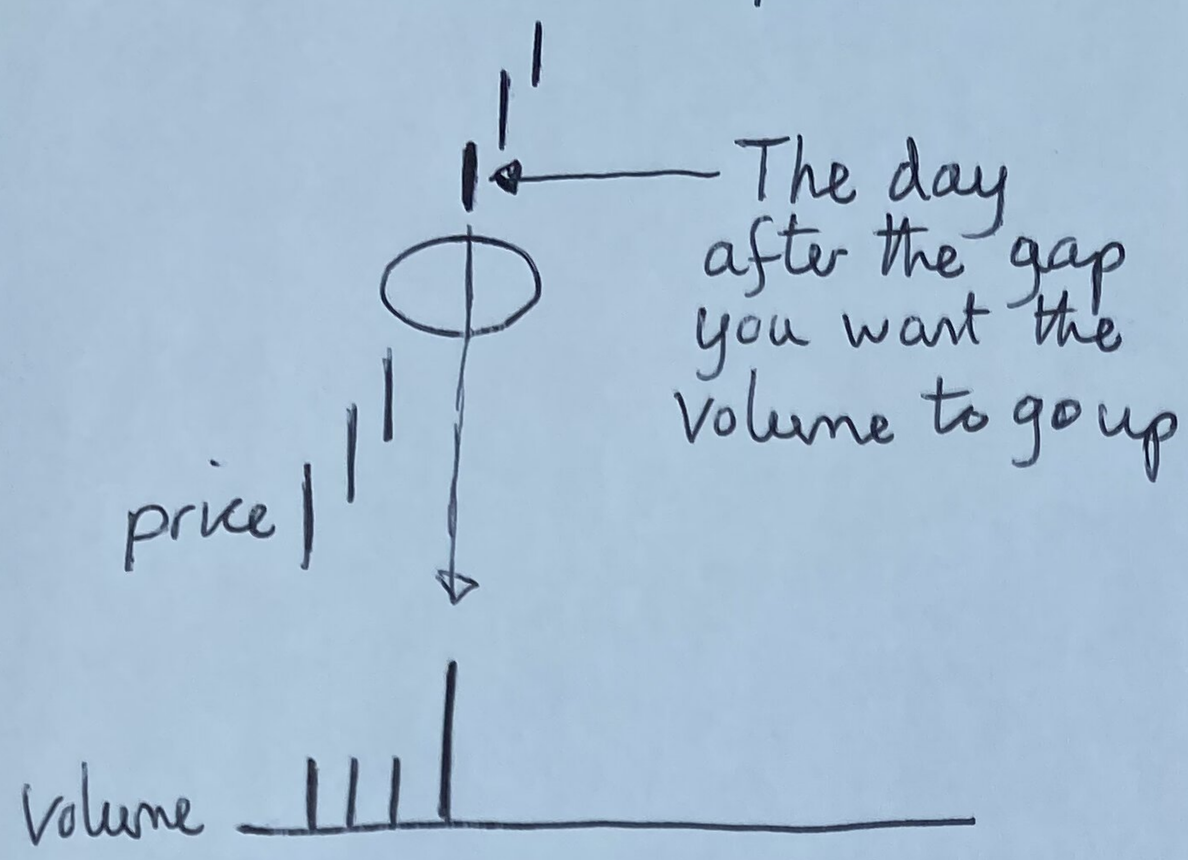
Continuation Gap



Shorting E.g.

You short 1000 shares of MSFT

MSFT $10 × 1000 = $10,000

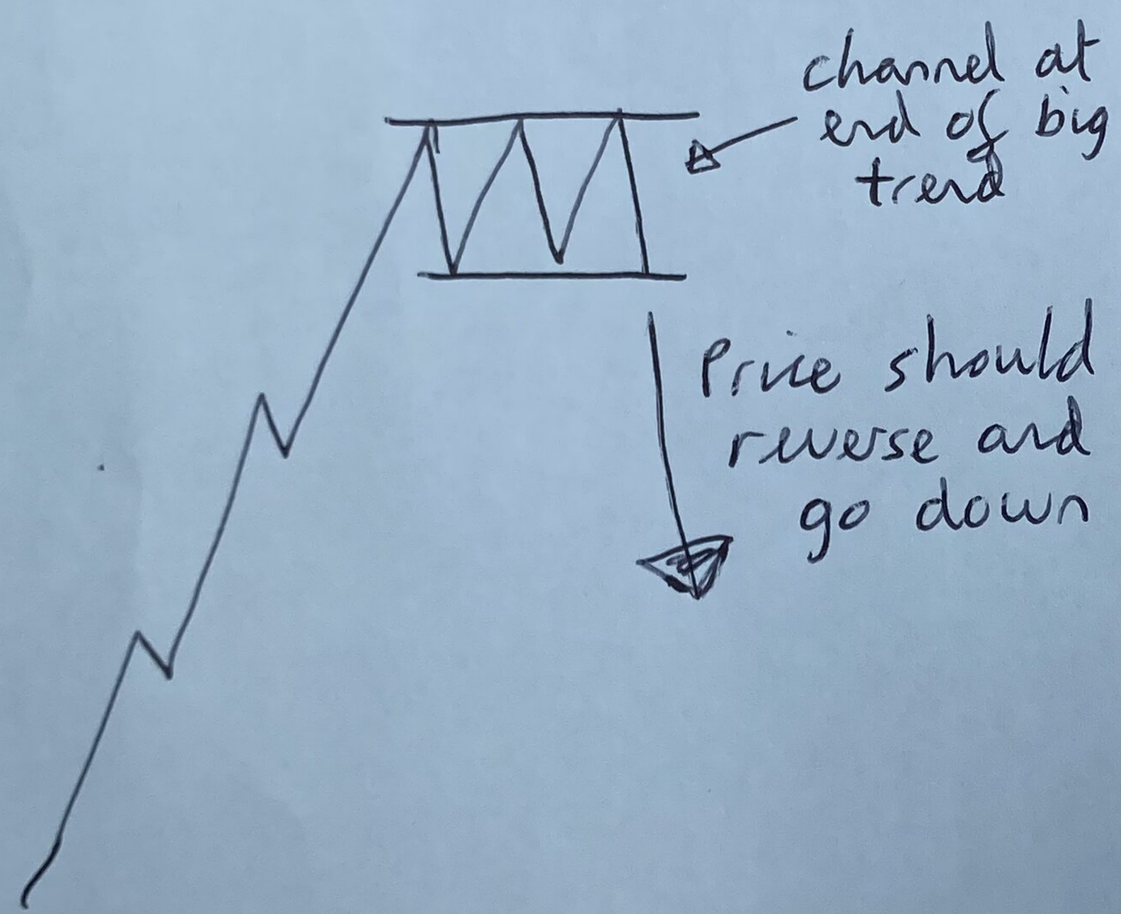
The shares are borrowed and sold and $10,000 goes into your account

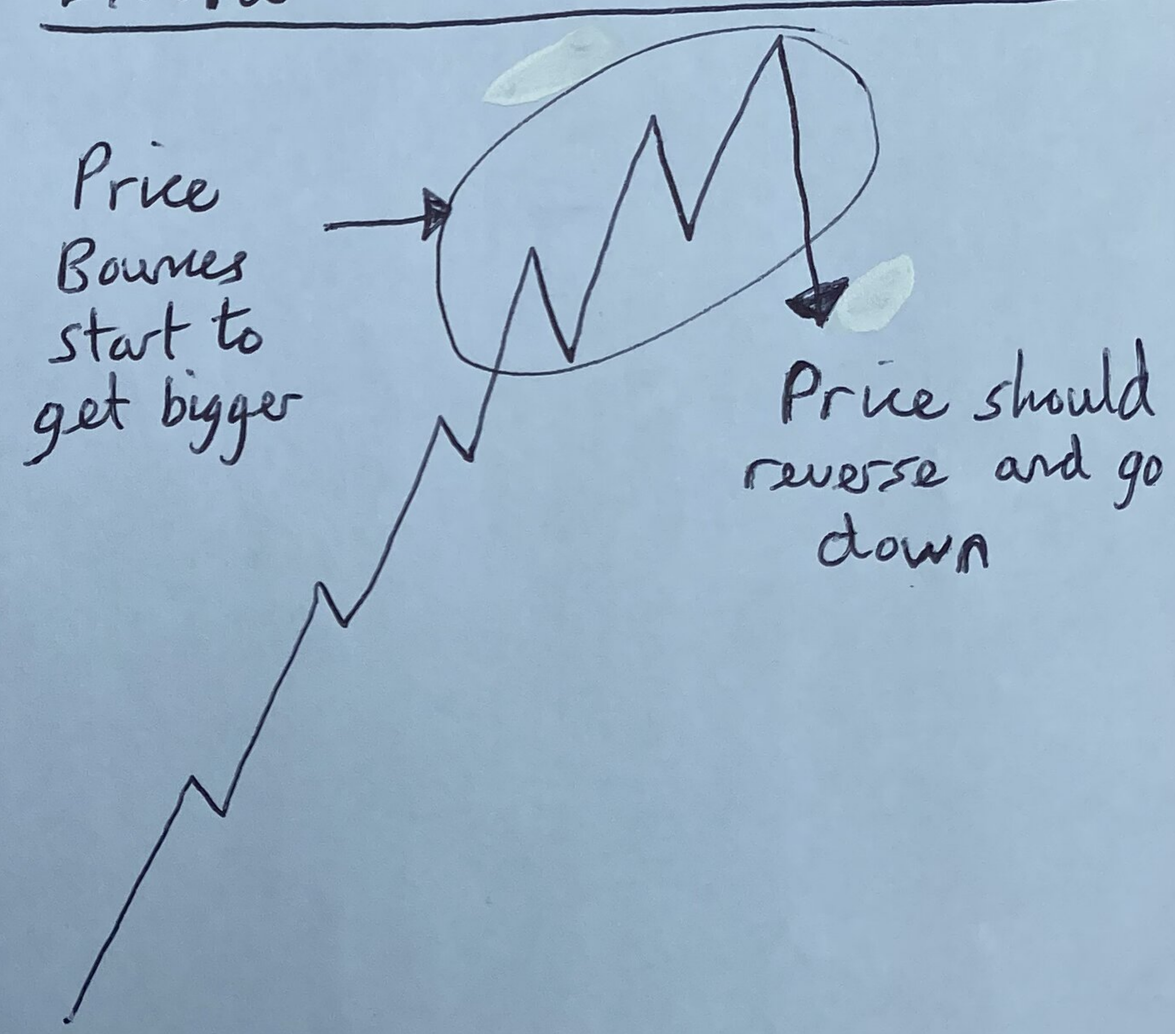
$4 × 1000 = $4,000

You buy them back at a lower price to give back

Your profit = $6,000

Extra Reversal Pattern 1





Extra Reversal Pattern 2
